Office of the DD/S&T

TO: Mr. Duckett

SUBJECT: Possible New Vu-Graphs

REMARKS:

Carl:

I mentioned to you this morning that [redacted] and I were trying to develop some new vu-graphs, and the two which are attached are examples. You gave the OK on the top one for "R&D Process" but I thought you might like to see what it looks like. The second one "Closing the Intelligence Loop" seems to depict the philosophy of DDS&T more graphically than the old FUNCTIONS vu-graph we had. Regarding this proposed one we might show ORD lightly for the Collection Function [redacted] since the collection function must be qualified for any R&D group.

We would appreciate your comments or approval for the second vu-graph.
